Rapid and accurate ERP deployment is important for companies. The Configuration Development Kit can be used to build specific industry and regional Business Accelerator solutions for faster deployment and improved ongoing system administration and support.

The Issue: ERP Systems Need to be Implemented Quickly and Reliably across Industries and Geographies

Businesses across the globe must perform efficiently under increasing pressures of global competition, economic swings, and complex, evolving government regulations. Your business often has fewer resources than your larger competitors and you need to implement sophisticated systems to help your organization succeed. In particular, many small and medium businesses across the globe in different industries need sophisticated systems that can be implemented reliably, quickly and economically to remain competitive.

The Solution: Configuration Development Kit Speeds Deployment of Oracle Business Accelerators for JD Edwards EnterpriseOne

Oracle Business Accelerators for JD Edwards EnterpriseOne are tools that contain questionnaires, configuration and various assets to aid in the implementation of a JD Edwards EnterpriseOne system. Oracle Business Accelerators are built for specific regions and industries to address the particular implementation requirements of businesses across the globe. By leveraging Oracle Business Accelerators and a
